

Continuation of "at least one error upon which reissue is based":

Claim 10 is also being broadened to replace the limitation that a plurality of apertures must be located "intermediate said second side wall and said upwardly extending longitudinal wall" with a broader limitation that the apertures be located "proximate said upwardly extending longitudinal wall". The limitation of claim 10 in the issued patent stating that the apertures must be located "intermediate said second side wall and said upwardly extending longitudinal wall" is an error because it unduly restricts the location of the apertures.
